

### **Artwork Format Requirements**

We ask that you follow these guidelines when supplying us with artwork for your sign or other printed graphics.

This will ensure that we can re-create your artwork accurately.

### **Fonts and Text**

When supplying text please convert to paths (curves) or supply copies of all fonts used.

### **Media Formats**

We can accept files in the following formats: CD-ROM, DVD, Flash Drive & Email.

### **Vector Artwork (for Plotting/Cutting)**

For signage creation, we prefer files in a vector format. This allows our sign production machines to follow the contours of each letter. File types that we accept: EPS, AI & PDF.

### **Logo Supply (for Plotting/Cutting)**

When supplying your logo on file for reproduction on signage, a vector file is required.

If you cannot supply a vector file then we will have to reconstruct/redraw your logo in vector format which may incur an additional cost.

### **Bitmap Artwork (for Printing)**

All bitmap images should be supplied at a minimum of 300 dpi @ 100% in BMP, TIFF, PSD, PDF

or Hi Res JPEG.
